

Environmental statement

DACH QHSE

Version 2
September 2022

Our commitment

Shaping a World of Trust - Leave Your Mark in Shaping a World of Trust

For Bureau Veritas, this means making the environment a little cleaner, the working world safer and the business world more efficient every day. Active co-creation is the be-all and end-all - we focus on agility and team spirit! We empower our employees to think and act comprehensively. Together we work for the benefit of our 400,000 customers in more than 140 countries.

We are convinced that sustainable development is essential for the future of our planet. This means that protecting the environment is embedded in all the activities and services we provide to society. In every decision we make, we have in mind that water is becoming increasingly scarce, natural resources are under increasing strain, biodiversity is declining and climate change is exacerbating the planet's environmental challenges.

Our commitment

- Compliance with all legal environmental requirements, Group specifications and customer requirements at all our sites in the DACH region.
- Environmental awareness, training and sensitisation of our employees combined with effective communication.
- Promote responsible and environmentally conscious behaviour by our employees and contractors.
- Reducing our carbon emissions by using alternative energy from low-carbon or renewable sources in all areas and using energy-efficient vehicles.
- Improve our environmental performance by introducing a certified management system according to DIN EN ISO 14001 in all our units.
- Systematically evaluate our environmental performance to track the improvement of our CO₂ balance, the reduction of our waste and the reduction of water consumption to protect biodiversity.
- Maintenance of certification and continuous improvement of the management system.

In the DACH region, we try to integrate and consider environmental protection in all our activities. It is our commitment to protect the planet and future generations by minimising our impact on the environment. Sustainability is the responsibility of all of us - at every level of our business.

Laurent Louail
Regional Chief Executive NEE, September 2022
